

# UB Neurosurgery opens new center in Amherst, elevates patient care in WNY

By Caitlin Hartney

**O**n August 3, 2009, University at Buffalo Neurosurgery (UBNS) will open its newest location at 3980A Sheridan Drive in Amherst. The state-of-the-art physicians' office will provide members of the Western New York community and beyond access to comprehensive clinical services related to the evaluation and diagnosis of complex spine and brain disorders—including aneurysms, tumors, strokes, epilepsy, and Parkinson's disease—from one, centralized location.

Comfort, convenience, and accessibility guided the design of the new facility, reinforcing UBNS' commitment to excellence in patient care. Patients and their families will benefit from all of the amenities one would expect from a modern medical complex: spacious waiting areas; computerized exam rooms; free parking; full wheelchair access; and inclusive services, including in-house chiropractic and pain specialists and nearby diagnostic imaging facilities.

Most importantly, the expansion will facilitate UBNS' mission to continue to deliver innovative treatment options to its patients. The center will bring together the neurosurgery group's expert team of specialists and sub-specialists to better treat all areas of the brain and spine using cutting-edge, mini-

minally invasive surgical, endoscopic, endovascular, and neuromodulation techniques. UBNS will continue to offer services at Millard Fillmore Gates Circle and Suburban Hospitals, Buffalo General Hospital, and Women & Children's Hospital, as well as at its suburban offices in Olean, Fredonia, and Orchard Park.

UBNS is a nationally renowned academic neurosurgical group that specializes in

minimally invasive surgical and endovascular treatments of the brain and spine, and providing 24-hour service for acute stroke as part of the Kaleida Stroke Team. UBNS is committed to treating patients with compassion and dignity. For more information about the new center, or UBNS in general, visit [www.ubns.com](http://www.ubns.com) or call 716-887-5200.
